

International ERP projects

International ERP projects with Microsoft Dynamics AX and Sycor

We are your experienced partner for the implementation of major international ERP projects with Microsoft Dynamics AX and the associated development of global templates.

Sycor: developing and implementing globally deployable ERP solutions based on Microsoft Dynamics AX.

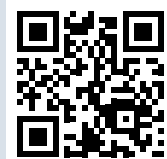

The conditions for creating a global ERP solution for businesses using Microsoft Dynamics AX 2012 are prime: the comprehensive high-performance ERP software Microsoft Dynamics AX 2012 provides increased operational efficiency throughout each business division, offering integrated support for purchasing, sales, warehousing, finance, accounting and

personnel management as well as other standard business processes. Furthermore, Microsoft Dynamics AX 2012 provides pre-defined functions that are tailored to suit the needs of sectors such as manufacturing, wholesaling/distribution, retail, service providers and the civil service.

With its impressive intercompany functionality, multi-currency and multi-language capabilities and its 36 precisely localized country versions, Microsoft Dynamics AX is the ideal solution for use in multinational organizations.

We work with you to implement your Microsoft Dynamics AX project successfully – and in the process we carry out the development of your global template and the rollouts to your worldwide branches and production locations.

We ensure that your processes for finance, logistics, production and intercompany business are harmonized and standardized, while also dealing with the practicalities of local requirements (such as law, language and culture). We achieve a fine balance for you between a central solution

and local implementations and transform Microsoft Dynamics AX 2012 into the ERP platform for your global enterprise – providing support for all of your processes in one central system.

As a well-established Microsoft partner, other benefits of our service include quality-assured hosting services with multi-language support, project monitoring with change management measures and optimum licensing arrangements from the start with our software asset management services, among others.

We support your international Microsoft Dynamics AX project with

- Experience with over 500 rollouts of global templates
- Experience with projects in more than 80 countries
- Experience with installations with thousands of users
- Experience with Microsoft Dynamics AX 2012 and previous versions ranging from Axapta 1.0 to Microsoft Dynamics AX 4.0 and Microsoft Dynamics AX 2009
- Established process and solution know-how
- Our locations and resources in Germany, North America and Asia
- A proven project management process model for templates and rollouts
- The Microsoft Dynamics® Sure Step method
- Change management measures

In your international Microsoft Dynamics AX project, we take care of

- The establishment of a global template
- The harmonization and standardization of company processes for finance, logistics, production and intercompany business
- Finding the right balance between a central solution and local requirements (language, culture, law)
- The optimization of master data handling
- Setting up the necessary interfaces
- The worldwide rollout
- The operation of your Microsoft Dynamics AX solution
- Optimum licensing arrangements with our software asset management services
