

# Sycor.Engineering

## The fully integrated SAP solution for midsize mechanical engineering and tool construction companies.

Flexible, reliable and a perfect fit – *Sycor.Engineering* is the optimum SAP industry solution for midsize companies in the mechanical engineering and tool construction sectors.

In the face of increasing international competition, you as a machine and tool manufacturer face the challenge of identifying and occupying new market niches as quickly as possible. Increasingly short innovation cycles simultaneously demand the rapid implementation of customer-specific or own specifications, while legal regulations impose more and more documentation and reporting requirements. In order to flexibly adapt your business processes to the dynamic changes in your industry, you need an IT solution that provides the best possible support.

*Sycor.Engineering* models all business management processes and implements them seam-

lessly along the value chain. You keep control of business processes and gain added planning certainty. With our compact *Sycor.Engineering* SAP industry solution, you follow the integrative approach of a full-scale ERP system with default settings that have been proven in practice. At the same time, you establish streamlined workflows that speed up the implementation of your customers' requirements in the form of new products, enhancing customer satisfaction and laying the foundation for further growth.

*Sycor.Engineering* covers the fields of engineering, project management, sales, procurement and production as a comprehensive solution. Shipping and service along with accounting are supported by the solution as well. The necessary information and data are at your employees' fingertips. A cohesive flow of information and the reporting functions provide a comprehensive overview of your current costs, revenues and customer data. Our preconfiguration based on best practice processes means *Sycor.Engineering* is up and running quickly – so that you implement efficiency improvements sooner. *Sycor.Engineering* offers a high level of security for your IT investments, short project implementation phases thanks to preconfiguration and employee training right from day one. Place your trust in business software that is easy to implement, flexible and tailored to your company. Trust in *Sycor.Engineering*.

### Your challenges:

- Shorter product life-cycles and rapid time to market
- Increasing product complexity
- High quality demands and order transparency
- Improving delivery performance and customer satisfaction
- Rising pressure to lower costs and innovate

### Your advantages:

- Support for your key processes
- Cohesive information flows
- Short implementation phase
- Efficient and transparent workflows
- Flexible and scalable solution
- High-quality mission-critical KPIs
- Practice-oriented training concepts
- Transparent view of all key performance indicators
- Preconfigured industry-specific processes ensure a high level of planning and process reliability
