Sycor.Rental

The Microsoft Dynamics AX 2012 solution for the rental industry

Sycor.Rental is the ERP industry solution for rental, service and maintenance of mobile goods. Rise to challenges like enormous competitive pressure, increasingly complex operations due to larger vehicle fleets and machinery outfits, and an ever-expanding range of services. *Sycor.Rental* boosts and ensures your success over the long term.

Sycor.Rental is a fully integrated global ERP industry solution for the rental, service and maintenance of mobile goods on the basis of Microsoft Dynamics AX 2012. With full performance in all modules, it is destined for international deployment. *Sycor.Rental* supports satisfied customers in more than 50 countries around the world for individual and bulk rentals. They can rely on unique multi-site, multi-currency and multi-language capabilities. All processes in one system: With *Sycor. Rental*, you gain control over the core rental process and over all business processes at the same time – across sites and countries!

Sycor.Rental maps the entire rental process chain: You and your employees can rely on high-capacity, cross-location functions and processes for quotations, CRM, scheduling and configuration, maintenance and service as well as accessory and equipment management. In addition, transport management for efficient planning, execution and billing of transportation, the comprehensive financial management of Microsoft Dynamics AX 2012 (financial accounting, asset accounting, cost accounting), the equipment file for asset lifecycle management of your equipment, machines and accessories, and comprehensive business intelligence functions providing options for evaluating rental stock and fleet utilization and for individual reports are included. The key for you: with *Sycor.Rental*, you have full control of your business at all times. For greater cost effectiveness and success. Our solution provides you with all tools for the best possible, flexible response to customer requests.

With experience from numerous projects around the globe, we have integrated optimized functions for specialized rental firms in *Sycor.Rental*. After all, not all rental firms are the same – the day-to-day requirements vary.

Core rental process

With *Sycor.Rental* rental is the core process: *Sycor.Rental* maps single rental as well as bulk rental processes with extensive functionality. Our solution covers long-term, short-term and project-specific rentals as well as warehouse and rental depot processes. Flexible automated billing methods are integrated with customer-specific, time and asset-specific prices. This allows you and your employees to respond to individual agreements with your customers thanks to flexible terms and conditions management. *Sycor. Rental* provides reliable and transparent support for everyday processes – including the following:

• Subcontractor rentals
• Rental cancellation
• Sale of rental
• Rental exchange
• Relocation between rental (storage) locations
• Large for small
• Guarantee and insurance management
• Order-specific service and project services
• Skills and qualifications management

Providing your customers with the rental assets they need, with the required equipment and the right accessories, is a matter of course for you. In *Sycor.Rental* you can permanently assign the required equipment to rental assets and configure them with special accessories or accessory packages for a specific project. When posting the delivery note, the accessories and equipment are included as line items. This ensures the complete

delivery or provision of the rental asset as well as traceability of customer returns or on-site pickups by your employees.

Thanks to the full integration of all modules and the comprehensive business intelligence and reporting functions in *Sycor.Rental*, you have firm control over all business processes. The features available to you include:

• Easy to use, graphical scheduling of your machines, equipment, accessories and personnel with DispoControl
• Calculation, planning and controlling at the equipment level with access to sales and capacity utilization for individual pieces of equipment, model series or groups at all times
• Access to professional tools for lifecycle asset management for individual pieces of equipment
• Fast and clear management of accessories and equipment
• Our transport management functions for optimum route planning, reduced costs and improved customer satisfaction thanks to accurate deliveries
• Optimum control of your maintenance and service processes with transparent allocation of the incurred costs
• In *Sycor.Rental*, we offer highly modern fleet management functions
• Always keep up to date in real time regarding your cash flow, open items, liabilities and current forecasts
